## MACGUARD® 2792 Antifreeze Product Data Sheet

### Inhibited Ethylene Glycol-based Antifreeze Coolant

MacGuard® 2792 Heavy Duty Antifreeze/Coolant is a fully formulated heavy duty antifreeze/coolant requiring no additive (SCA) precharge. It provides corrosion protection for all heavy duty cooling systems and is formulated to be compatible with antifreeze/coolants of all major producers.

For health and safety information for this product, contact Houghton for a Material Safety Data Sheet (MSDS).

MACGUARD® 2792 Antifreeze Typical Properties by Concentration		
Properties <sup>1</sup>	Conc.	50%
Ethylene Glycol	95%	48%
Performance Additives and Water	5%	52%
Appearance	Liquid, Clear, Green	Liquid, Clear, Green
Specific Gravity (15/15°C 60/60°F)	1.120 - 1.140	1.060 - 1.090
pH 50% glycol	7.5 - 11.0	7.5 - 11.0
Reserve Alkalinity (min)	6	3
Freeze Point Max (as 50%)	-34°F / -37°C	-34°F / -37°C

<sup>1</sup>Concentrate based on volume of Ethylene Glycol, mixtures based on volume of MACGUARD® 2792 Antifreeze

Use Recommendation: MacGuard® 2792 HD meets or exceeds performance requirements for both automotive and Heavy Duty cooling systems, including those with aluminum heat-rejecting components such as aluminum cylinder heads, water pumps and radiators. It provides corrosion protection for all cooling system metals and is formulated to be compatible with antifreeze/coolants of all major producers. It is SCA pre-charged with nitrite to protect heavy duty truck engine cooling components such as wet sleeve liners.

MacGuard® 2792 HD antifreeze/coolant should not be used in concentrated form in your vehicle. A 50% dilution is generally recommended for best balanced protection against corrosion and summer boiling. Do not dilute to less than 33-1/3% (Maximum freeze protection is at 70% if required). Water quality can be an important factor affecting the long-term corrosion protection of any antifreeze. Use only water of good quality (see ASTM D3306, General Requirements for water quality). Test coolant annually or at maintenance intervals, replace when depleted or, if testing is not done, replace every two years. For HVAC systems, recreational vehicles, and protection of other Hydronic systems, please consult the heat transfer fluids section of our website or call us for suggestions.

Formulated to Satisfy: ASTM D5216 and the corrosion limits in ASTM D3306, ASTM D4985, and ASTM D6210, SAE/J1034, SAE/J1941, and Federal Specification OA548D; satisfying both Hot Surface Aluminum protection requirements of ASTM test D4340 and Cummins Heavy Duty Low Silicate requirements, and is designed to meet the requirements of TMC RP-330, GM1825M, GM1899M, Chrysler MS7170, Ford ESEM97B44A, Cummins CES 14603 and Caterpillar. In compliance with Military Specification CIDA-A-52624.

Cautionary Information: Ethylene glycol, the major component of MacGuard® 2792 Heavy Duty, is poisonous to humans and animals when ingested. Store only in closed containers with complete cautionary information thereon, in a cool, secure place, out of reach of children. Do not use in any system connected with potable water. Ask us about other Houghton Chemical products specifically designed for this purpose.
